MS50157 (front right lower—2009-2004)

SAVE TIME AND MONEY!

MEVOTECH X-Factor innovation is at work again — for the GMC Envoy and the Chevrolet Trailblazer.

This Mevotech X-Factor lower control arm application includes **bracket, bushings, and a HEAVY DUTY greaseable ball joint** as a **one-piece replacement**. These individual components are often sold separately from the dealership, meaning additional installation and replacement time. The Mevotech X-Factor replacement includes all three components, pre-assembled and ready for installation — right out of the box!

Lower your installation time, increase your efficiency, and ensure the job is done right by reaching for Mevotech Supreme Control Arms.

When Performance, Design, and Selection matter, ask for the Mevotech Supreme.
